

All-vanadium liquid flow energy storage equipment

Overview

Self-contained and incredibly easy to deploy, they use proven vanadium redox flow technology to store energy in an aqueous solution that never degrades, even under continuous maximum power and depth of discharge cycling. Our technology is non-flammable, and requires little. On the afternoon of October 30th, the world's largest and most powerful all vanadium flow battery energy storage and peak shaving power station (100MW/400MWh) was connected to the grid for power generation in Dalian, Liaoning. This technology offers enhanced efficiency compared to traditional methods, 2. represents a sustainable alternative due to its recyclable components, 3. provides extended life. Modular flow batteries are the core building block of Invinity's energy storage systems. Explore applications across utilities, industrial parks, and solar/wind farms - plus market projections showing 23% annual growth through 2030.
