

Are there solar air conditioners for sale in brazil

Overview

An air conditioner that consumes 50% less energy is close to arriving in Brazil. That's because a large part of its operation is powered by solar energy, and the installation is simpler than that of a conventional air conditioner. Collaborations between solar technology providers, HVAC manufacturers, and government agencies are boosting large-scale adoption. The Brazil Solar Air Conditioning Market is projected to grow from USD 2.8 billion by 2031, at a CAGR of 24. As interest in renewable energy grows, the solar air conditioner in Brazil emerges as a key player in the solar applications market, presenting the alternative that has been gaining prominence is the use of solar energy to power these devices, with a significant increase of 190% in searches for "air conditioning with solar panel" in the last year, according to studies by Descarbonize Soluções, a company specialized in air conditioning. This growth is driven by rising urbanization, increasing disposable incomes, and the growing need for cooling solutions due to higher temperatures.
