

Benin new energy solar air conditioner

Overview

The combination of abundant sunshine (4. 5-6 kWh/m² daily) and rising electricity costs creates perfect conditions for solar AC adoption. Let's With temperatures. Benin's government has reaffirmed its intention to make renewable energy the main source of the country's power supply by 2030. Access to electricity in Benin remains both low and highly uneven: Around 42% of urban households are connected, with less than 13% in rural areas. This initiative is a key part of a broader national strategy to diversify energy sources, increase the share of renewables, and transition toward a cleaner future. The OGEAP was allocated \$31 million to improve off-grid electrification with the Off-Grid Clean Energy. Axian Energy, in partnership with its investment partner Sica Capital, has announced the launch of a major solar energy project in the Republic of Benin, with an investment of €45 million aimed at providing clean electricity to around 50,000 households. Solar Power Plants The project involves the.
