

Boston lead battery energy storage

Overview

It requires investor-owned utilities to secure 5,000 megawatts (MW) of storage by 2030. This includes 3,500 MW of mid-duration, 750 MW of long-duration, and another 750 MW for multi-day storage. The goal is to modernize the grid and integrate renewable energy fully. State officials say more of these batteries will bring down utility bills, make the grid more reliable and enable the. A Battery Energy Storage System proposed for construction in Brighton at 35 Electric Ave. has generated a wave of resident backlash to underdeveloped regulation of BESS facilities, which state officials say are necessary to achieve carbon neutrality. The project would house lithium-ion batteries to. Massachusetts is taking significant strides towards energy independence with the ambitious Trimount battery storage project in Everett. ESN Premium speaks with Mukesh Chatter of Alsym Energy about the.
