

Burundi power plant energy storage project

Overview

This project is designed to directly (i) reduce the current electricity supply deficit, (ii) decrease reliance on costly and polluting thermal energy production, and (iii) increase the electricity access rate. The Jiji and Mulembwe Hydropower Project aligns with Burundi's strategic commitment to. The President of the Republic of Burundi today officially inaugurated the Jiji hydroelectric power plant, in the presence of a large delegation of national authorities and representatives of the development partners that co-financed the project. Located in Bururi province, this large-scale. The project concerns the development of two hydropower plants and the construction of infrastructure required for electric power transmission and distribution. The two hydropower plants are about 3. "We expect the station to be ready by November 2021 as I's local subsidiary Gigawatt Global Burundi SA. The multinational effort was Burundi's first substantial energy generation project in over three.
