

Can portable wifi be plugged into a power source

Overview

The short answer is yes — a power bank can keep your network devices on for the time being. Most low-capacity power stations will keep your router running for almost a day if it isn't powering other devices, and high-capacity chargers can keep routers and. But if you work remotely, game online, or have internet-dependent smart home devices, there are two other things you don't want to lose power: your router and modem. Unfortunately, even the models from major wireless router brands and modem brands don't come with built-in battery backup. The Jackery Solar Generators are compact and powerful solar-powered generators that can charge different types of WiFi routers and modems, ensuring you never have to lose access to work anywhere you. Wi-Fi routers need a power source to function, meaning Wi-Fi cannot work without electricity. [com/Xiaomi-20000mAh-Capacity-External-Compatible/dp/](https://www.mi.com/Xiaomi-20000mAh-Capacity-External-Compatible/dp/). , clearly states 5. If it can output higher voltage on USB-C, you would need the correct "handshake".
