

Canberra Off-Grid Solar Outdoor Cabinet

Overview

Designed for outdoor deployment, the cabinet features weather-resistant construction, efficient ventilation or air conditioning, and options for battery and DC distribution integration. With robust protection (IP55/IP65), it ensures reliable operation in remote, off-grid. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. With backup power during outages and reduced reliance on the grid, you gain control over your energy use and costs. Solar4Life's battery systems let you store unused. Off grid systems are completely disconnected from the grid. They require years of experience and a high degree of professionalism across all aspects of the process from component selection, system sizing and installation. They must be sized correctly for your individual consumption patterns, with. The solar regulator, fuse switch (with 3 fuses), shunt, PLS2 shunt adaptor, and solar panel input isolators, are all pre-wired on an insulated board, inside a lockable steel weatherproof cabinet. Also included are labelled brass terminals for inverter, batteries and battery charger.
