

# Companies developing electric cabinet ships

## Overview

This report identifies and benchmarks the best Electric Ship manufacturers such as Kongsberg (Norway), ABB (Switzerland), Wartsila (Finland), Norwegian Electric Systems AS (Norway), Corvus Energy (Canada), and evaluates them on the basis of business strategy excellence and. This report identifies and benchmarks the best Electric Ship manufacturers such as Kongsberg (Norway), ABB (Switzerland), Wartsila (Finland), Norwegian Electric Systems AS (Norway), Corvus Energy (Canada), and evaluates them on the basis of business strategy excellence and. Manufacturers are integrating electric drive propulsion for ships powered by lithium-ion batteries to maneuver the vessel. According to a report by Extrapolate, the global electric ships market size is projected to grow to USD14. 39 billion by 2032, from USD 4. The market is driven by stringent emission regulations, high fuel costs, and the shift toward sustainable maritime operations. It encompasses the design, development, and. These startups develop hybrid propulsion systems, improved hull designs, waste heat recovery systems and advanced vessel management systems, aiming to provide sustainable solutions for shipping. PowerX brings power transfer technology to life, allowing for greater usage of renewable energy sources. Electric ships companies are at the forefront of a maritime revolution, leveraging advanced technologies to reduce the environmental impact of the shipping industry. Fully electric container ships are now operating in China and Europe on short. Skyquest Technology's expert advisors have carried out comprehensive research and identified these companies as industry leaders in the Electric Ship Market.

## Article Content

### Top Electric Ships Companies & How to Compare Them (2025)

Fincantieri: Italian shipbuilder integrating electric propulsion in cruise and naval vessels. Hyundai Heavy Industries: South Korean giant developing electric propulsion for commercial ships.

### Electric Ship Companies

The electric ship market is defined by the presence of five leading players, namely ABB (Switzerland), Wärtsilä (Finland), GE Vernova (US), SCHOTTEL Group (Germany), and Corvus Energy (Norway).

### Top 10 Electric Ships And Ship Battery System ...

Top players in the maritime industry are significantly investing in electric powered ships to adapt to sustainable transport. This blog explores the list of the top 10 electric ship manufacturing ...

### Top Companies Evaluated: Electric Ships | Quadrant

The report includes market specific company profiles of all 20 top electric ship companies and assesses the recent developments that shape the competitive landscape of this highly fragmented market.

### Top Companies in Electric Ships (Oct, 2025)

Discover the top emerging companies in the Electric Ships Startups, their funding activity, key investors, company highlights, and growth stages

### Electric Container Ships | Maritime Electrification | ElectronsX

Electrification in this sector is still at an early stage due to the enormous energy demands of long-haul shipping. However, coastal container ships, feeder vessels, and short-sea shipping are beginning to ...

### Clean Marine Switchboards powerful battery cabinet for hybrid ships

Clean Marine Switchboards has developed and delivered an integrated energy grid system that help ships reduce emissions and to run their propulsion systems fully electric or in a hybrid mode.

### Top 11 Energy-efficient Ship startups 2026

These startups develop hybrid propulsion systems, improved hull designs, waste heat recovery systems and advanced vessel management systems, aiming to provide sustainable ...

### Electric Ship Market Companies

Established maritime players like ABB, Siemens, and Wärtsilä continue to lead with their innovative electric propulsion and energy storage solutions. New entrants such as Corvus Energy and Echandia ...

### Electric Ships Companies

Discover companies at the forefront of the electric ships market, revolutionizing maritime transportation with sustainable solutions.
