

We've put together this guide comparing a redundant power supply vs UPS, or uninterruptible power supply, to help you gain a clear grasp on the nuances between these two styles. Eaton offers a full suite of rackmount UPS products for enterprise-class battery backup for network closets, IT server racks, mission critical applications and high density computing environments with power ratings ranging from 550 VA to 60 kW. Eaton rackmount models are available from 1U rackmount. That's why understanding the differences between UPS systems matters, and a thorough Uninterruptible Power Supply Comparison is the starting point for making an informed choice. These systems ensure critical equipment stays online during outages, preventing costly downtime and data loss. A UPS traditionally provides two things: Battery backup power if the primary power source is unavailable.
