

Georgia rural solar power system

Overview

This report quantifies the current and expected land area devoted to utility-scale solar in Georgia, places this land use in the broader context of statewide farmland and forest land change, and highlights basic considerations for policymakers, landowners, and communities. From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect. Across the country, solar farms have experienced rapid growth, supported by advancements in technology, cost reductions, and policy initiatives such as state-level renewable portfolio standards and tax credits. As shown in Map 1, roughly 18% of ground-mounted PV facilities in the U. Nearly all utility-scale solar in the state has been constructed on farmland or forest land, which are already experiencing significant. Following years of pushback from a utility that was “adamantly opposed” to community solar, Georgia Power agreed to work “in good faith” to enable a path forward for community solar and Solar for All. Image: Deidra Hodges Georgia Power agreed to. On this page, you can explore our database of solar projects in Georgia. As of January 2026, there are 19 solar projects in development in Georgia, according to.
