

Georgia wind power energy storage project

Overview

BESS projects improve the efficiency of renewable energy by storing excess power during low-demand periods for use during high-demand times, such as cold winter mornings when solar energy is unavailable. These facilities address power needs identified in the 2023 IRP Update. Georgia Power announced today that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County, southeast of Macon, Ga. Photo by Anna Vasileva Located in Twiggs County, southeast of Macon, the company-owned facility is. Georgia Power advancing projects in Bibb, Lowndes, Floyd and Cherokee counties to enhance reliability, resiliency for a growing state ATLANTA, May 7, 2025 /PRNewswire/ -- Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS). Georgia Power is seeking 500 MW of energy storage with a minimum of 500 MWh to support its renewables expansion, as part of its 2022 Integrated Resource Plan (IRP). The new storage capacity will facilitate the integration of additional solar and wind resources into the grid, marking a significant. 200 MW BESS to help deliver reliable capacity for customers and meet energy needs in the winter of 2027-2028 ATLANTA, Oct.
