

High-Temperature Outdoor Cabinets for Production Lines German Type

51.2V 300AH

Overview

Our outdoor switch cabinets and distribution cabinets are used wherever technology needs to be operated safely and reliably outdoors: Our double-walled outdoor cabinets offer passive thermal protection through a cleverly ventilated partition wall. Sichert is a market leader in the manufacturing of passive outdoor and active cabinets, based in Berlin Germany. Founded in 1923, the family-owned company has always stood and prided itself for its engineering and manufacturing capabilities along with quality and trust. Due to their innovative control system and the careful selection. For aging tests, tests or storage at constant or alternating climatic conditions, tests at high or low temperatures, warming or cooling storage, burn or run in tests, simply drying (also under vacuum) applications, determination of ash content, we offer different temperature, heating and climatic. This means that components and processes can be monitored, and intelligent cabinet access management can be employed (RFID). We can produce dry cabinets precisely according to your requirements. Take a look at some examples and let us know what you need.

Article Content
