

Installation solution for two-way charging in integrated energy storage cabinet

Overview

Utilizes an integrated coupling design of high-low voltage power distribution and charging equipment, achieving high integration, significantly reducing overall volume, and adapting to diverse site deployment needs. Fast DC charging with built-in 208.9 kWh battery, V2G-ready control, and smart O&M—engineered for uptime and ROI. As EV sites scale, the limits of the grid show up first: high demand charges, transformer bottlenecks, and costly upgrades. Wenergy provides fully integrated, outdoor-rated ESS cabinets using LiFePO₄ technology with modular design and robust safety architecture. Photovoltaics, energy storage and charging are connected by a DC bus, the storage and charging efficiency are greatly improved compared with the traditional AC bus. The system adopts a distributed design and. Relying on its cutting-edge clean power conversion technology, industry-leading battery technology and grid forming technology, Sungrow focuses on integrated energy storage systemsolutions. The core components of these systems include PCS, lithium-ion batteries and energy management systems.
