

Off-grid type power cabinet for field operations

Overview

The Hybrid Power and Battery Combo Cabinet integrates grid power, solar input, and battery energy storage into a single outdoor solution. Ideal for telecom base stations, edge data centers, and surveillance applications, the cabinet features a modular structure with IP55/IP65. MOBICELL cabinets deliver clean, autonomous power in a compact, stationary footprint — built for sites where reliability matters as much as space efficiency. Designed for telecom, security, industrial, and grid backup, these rugged systems provide continuous, unattended power where trailers or. Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. The growing operational complexity of our power grids thus calls for broader, more powerful and smarter grid infrastructures. Power grids depend on reliable solutions to ensure trouble-free operations. The control room is considered one of the most critical areas in any facility, impacting daily decision-making and overall. The KonkaEnergy Outdoor Separate Battery Cabinet Series, a safe, reliable, and highly scalable solution designed for modular energy storage projects.
