

Over \$1.4 billion invested in solar energy storage

Overview

Companies across the United States are investing in record-levels of solar and energy storage to power their operations. The two projects will achieve commercial operation later this year, providing capacity and energy to support grid resilience. TransGrid Energy LLC, a leading owner and operator of utility-scale renewable energy projects under Hanwha FutureProof, has successfully secured over \$1.4 billion in. Global grid-scale energy storage provider Energy Vault announced it secured a \$300 million preferred equity investment with Orion Infrastructure Capital, launching a fully consolidated subsidiary called Asset Vault. The company said Asset Vault is dedicated to developing, building, owning and. Investments could total US\$1.4 trillion from 2025 to 2030—with similar expenditures until about 2050. 7 gigawatts (GW) of new capacity in Q3 2025, marking the industry's third-largest quarter on record and pushing total. There are now 262 gigawatts direct-current of solar capacity installed nationwide, enough to power 45 million homes.
