

Papua new guinea off-grid solar cabinet-based smart type

Overview

Prepaid solar mini grids combine smart meters with mobile or voucher-based payments so households, clinics, schools, and businesses in rural PNG can access electricity when they need it and only pay for what they use. Off-Grid Masters Limited is committed to revolutionizing access to energy in Papua New Guinea's most challenging environments. By harnessing the power of renewable energy, we bring cost-effective, reliable solar and wind solutions to remote areas, homes, businesses, and government agencies. It works across some of the most remote and hard to reach parts of the country to provide clean, accessible and renewable energy to communities with limited access to electricity. Fewer than one in five people in Papua New Guinea have access to electricity, and Papua New Guinea is making significant strides in improving its energy infrastructure, with a strong focus on renewable sources like solar power. The government recently launched a key solar project in the Katima rural area of the Sinasina-Yongomugl District, Chimbu Province, designed to bring. The Government of Papua New Guinea, with support from the United Nations Development Programme (UNDP) and the Government of Japan, today inaugurated the Advancing Energy Access: PNG Mini-grid Policy and Implementation Conference in Port Moresby.
