The Building Seismic Safety Council (BSSC) was established in 1979 under the auspices of the National Institute of Building Sciences as a forum-based mechanism for dealing with the complex regulatory, technical, social, and economic issues involved in developing and promulgating building. Certain environments require extra protection for rackmounted equipment. Eaton Seismic Cabinets are performance-tested to. stem feetWhen securing cabinets equipped with stem feet, it is common practice to use a clamping beam having a fork formation in each end, more exactly each comprising two fork arms and an intermediate slot in the longitudinal direction of the clamping beam. During mounting the clamping beam is.
