

Precautions for installing battery cabinet

Overview

The battery cabinet must be properly earthed/grounded and due to a high leakage current, the earthing/grounding conductor must be connected first. Electrical equipment must be installed, operated, serviced, and maintained only by qualified personnel. If there are any questions concerning this manual or any of the installation or maintenance procedures and/or intenance should always be performed with heavily insulated tools. It is also recommended to wear rubber gloves, boots. ZincFive batteries. This involves more than just connecting wires; it requires careful attention to ventilation and clearance. Also note all SAFETY. If you encounter any installation or operational issues with your product, check the pertinent section of this manual to see if the issue can be resolved by following outlined procedures.
