

Romania solar energy storage

Overview

In July 2024, the Romanian government passed a new law, 255/2024, which specifies that owners of PVs with a capacity of 3kW to 200kW must install at least 30% of their capacity in energy storage, and owners of 200kW to 400kW must install at least 50% of their capacity in energy. In July 2024, the Romanian government passed a new law, 255/2024, which specifies that owners of PVs with a capacity of 3kW to 200kW must install at least 30% of their capacity in energy storage, and owners of 200kW to 400kW must install at least 50% of their capacity in energy. Romania enters 2026 with renewed momentum across its solar and energy-storage markets — but also with a sharper sense of discipline. The era of inflated pipelines and speculative grid bookings is fading; the market is maturing, and investors now demand a cleaner, more bankable landscape. What. In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. Power, Hidroelectrica, Engie and more big names. Recent updates about investments in battery energy storage. Econergy's Parau solar park in Romania currently operates at 92 MW and is planned to expand by 310 MW in the next phase. The developer is integrating battery storage across its 3.3 GW Romanian PV pipeline, supported by €150 million in government funding and grid fee exemptions.

Article Content

Romania battery storage: Impressive 15MWh Project Supported

Project Development and Timeline for Romania battery storage The project was developed by Energy Solar NRG SRL and successfully secured non-recourse financing from DHB Bank in ...

Econergy expands hybrid solar and storage portfolio in Romania

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in the Romanian ...

Romania – pv magazine International

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Battery Energy Storage Solutions in Romania

Driven by rising electricity prices, poor infrastructure in rural areas, and rising solar adoption, more and more Romanian homeowners, farmers, and businesses are turning to solar + ...

Romania's Solar & Storage Outlook for 2026: Clarity, Discipline and ...

Romania enters 2026 with renewed momentum across its solar and energy-storage markets — but also with a sharper sense of discipline. The era of inflated pipelines and speculative ...

How Is Energy Storage Revolutionizing Romania's Future?

For Romania, this continental push underscores the urgency of scaling up storage to ensure grid reliability while boosting the share of renewables like solar and wind.

Motives of future growth of the Romanian energy storage market

Romania plans to add 5GW of capacity through renewable energy auctions, of which 500MW will be solar PV and 1GW will be onshore wind, to further promote the development of the ...

Big things ahead for Romanian BESS investments

“As other European BESS markets become increasingly saturated, Romania stands out,” said Evangelos Gazis, Aurora's head of Southeastern Europe, adding that the investment case for ...

Battery storage project pipeline in Romania in rapid expansion

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities.

Romania Needs Battery Storage, Not Just Solar Panels

Battery Energy Storage Systems represent the missing link in Romania's renewable energy infrastructure. These industrial-scale batteries capture excess solar generation during the day ...
