

Smart pv-ess integrated cabinet with expandable delivery time

Overview

All-in-one design, integrated with PV. Suitable for industrial and commercial scenarios, which supports functions like timed scheduling, peak-shaving, PV self-generation & consumption and so on., smart air-cooled heat dissipation, single cabinet capacity of 215kWh. Maximum support for. installation. no circulating current, safer for use. Multi-dimensional integration :Advanced DC coupling seamlessly integrates PV and storage; 20ms auto-switching between grid-connected and off-grid modes. Technical. Four in - cabinet PV interfaces with built - in inverter—no extra inverter needed, cuts costs & simplifies setup. Connects grid and backup generators for flexible power input. This document may contain forecast information, including but not limited to future finances, operations, product series, new technologies, etc. Due to practice the uncertainty in the actual results may differ from the predicted information. Therefore, the information in this document.
