

Supplier of bidirectional charging for subway station integrated energy storage cabinet

Overview

In January 2024, the Hager Group Brand E3/DC introduced a certified solution for bidirectional charging to the German-speaking market together with Volkswagen, making it the first supplier in the German-speaking market. Designed to meet the growing demand for electric vehicle infrastructure, this innovative solution allows not just vehicle charging, but also energy storage and return. Sabine Busse, CEO of Hager Group, emphasized the crucial importance of bidirectional charging and stationary energy storage systems for the energy supply of the future at an event of the Chamber of Industry and Commerce in Saarbrücken. Equipped with this technology, EVs can not only draw power from the grid but also return electricity to it, or supply power to homes during peak demand or in the event of blackouts. Meanwhile, lower-cost alternatives to lithium, such as sodium-sulphur, are also being developed. What is BESS?

Battery Energy Storage Systems (BESS) are systems.

Article Content

New EV Charging Stations, Electric Vehicle Grid Integration

The SCU integrated container solution integrates charging, integrated energy storage, power distribution, monitoring and temperature control systems inside, and has smart ev charging station ...

Bidirectional Charging & Energy Storage Solutions

Hager Group develops and markets innovative solutions that allow electric vehicles to be used as storage for excess solar energy and feed this energy back into the home or public grid as ...

Products

Our cutting-edge products, ranging from smart inverters to integrated energy storage, are tailored to empower homes, businesses, and industries with reliable and eco-friendly energy management.

Bi-directional charging for efficient energy management | Infineon ...

Our power semiconductor components make the difference in bi-directional charging
Uncover the possibilities for sustainable energy management!

Expanding Battery Energy Storage with Bidirectional Charging

Explore how Battery Energy Storage Systems (BESS) and Bidirectional Charging (BDC) are transforming energy storage, improving efficiency, and maximizing renewable energy.

Best Bidirectional EV Charging Station Supplier, Factory

Designed to meet the growing demand for electric vehicle infrastructure, this innovative solution allows not just vehicle charging, but also energy storage and return to the grid, making it an efficient choice ...

Energy Storage System for Fast EV Charging | EVB

EVB delivers smart, all-in-one solutions by integrating PV, ESS, and EV charging into a single system. Our energy storage systems work seamlessly with fast charging EV stations, including level 3 DC ...

Enhancing EV Charging Infrastructure with Battery Energy Storage

One of the most effective ways to achieve this is by integrating Battery Energy Storage Systems (BESS) with EV charging stations. This innovative approach enhances grid stability, ...

The Future of EV Charging: How Sigenergy's Bi-directional Charging ...

In partnership with NIO, a leading EV manufacturer in China, Sigenergy has demonstrated the viability of bi-directional charging as a mainstream energy solution. This milestone marks a ...

BATTERY ENERGY STORAGE SYSTEMS FOR CHARGING ...

Reinforcing the grid takes many years and leads to high costs. The delays and costs can be avoided by buffering electricity locally in an energy storage system, such as the mtu EnergyPack.
