

UK schools use network-connected communication power supply cabinets

Overview

As per the technical requirements outlined in the standards, educational institutions are mandated to equip their network switches with '2 power supplies', one of which must be a minimum of one UPS system (uninterruptible power supply). Make sure your school or college has proper network switches and switching infrastructure for reliability, security and resilience. This standard is one of the 6 core standards. It is to be read in conjunction with the Generic Design Brief (GDB) and the School-specific Brief (SSB). Who is this publication for?

This document is for. Data network cabinets are required to house and connect the incoming broadband connection for your school, with your school IT network and the associated equipment. However, many schools feel perplexed by the guidance and are in need of support to understand why the standards matter. In January 2024, the Department for Education (DfE) updated their guidance on digital and technology standards for schools and colleges.
