

Wide-temperature-range battery cabinets for distributed energy data centers

Overview

Factory assembled with LFP (Lithium-Iron-Phosphate) battery modules and Vertiv's internally-powered battery management system, this model Vertiv EnergyCore Cabinets are optimised for five minutes end-of-life runtime at 263kWb per each compact, 24" wide (600mm) cabinet, to operate. Factory assembled with LFP (Lithium-Iron-Phosphate) battery modules and Vertiv's internally-powered battery management system, this model Vertiv EnergyCore Cabinets are optimised for five minutes end-of-life runtime at 263kWb per each compact, 24" wide (600mm) cabinet, to operate. COLUMBUS, Ohio-- (BUSINESS WIRE)--Meeting the urgent need for solutions supporting high-density computing in increasingly crowded data center facilities, Vertiv (NYSE: VRT), a global provider of critical digital infrastructure and continuity solutions, today introduced Vertiv™ EnergyCore battery. Factory assembled with LFP (Lithium-Iron-Phosphate) battery modules and Vertiv's internally-powered battery management system, this model Vertiv EnergyCore Cabinets are optimised for five minutes end-of-life runtime at 263kWb per each compact, 24" wide (600mm) cabinet, to operate across a wide. Vertiv EnergyCore battery cabinets save valuable floor space with internally integrated accessories and can be seamlessly paired with Vertiv medium and large UPS systems. Vertiv has launched the Vertiv EnergyCore battery cabinets. Factory assembled with LFP.
